

What is claimed is:

1.A device for changing game patterns continuously,  
including:

5 a main body which sets a window on the surface;  
two pivots setting parallel within said main body, both ends  
of each pivot penetrate through and expose over said main  
body; and

a drawing plan with plural game patterns setting on said two  
10 pivots by two ends so as to change the game patterns by  
rotating the pivots and render one of the game patterns  
exposing from the window of the main body.

2. The device for changing game patterns continuously  
according to claim 1, wherein said main body at least sets one  
15 storage space which can store game objects relating to the game  
patterns.

3. The device for changing game patterns continuously  
according to claim 1, wherein said main body is installed at  
least one supporting device to lift up said main body.

20 4. The device for changing game patterns continuously  
according to claim 1, wherein a transparent board covers on the  
surface of said main body and said window.

5. The device for changing game patterns continuously  
according to claim 4, wherein said transparent board can be

glass or acrylic fiber.

6. The device for changing game patterns continuously according to claim 1, wherein a placing space for placing game objects relating to the game patterns is set between said main  
5 body and said two pivots.

7. The device for changing game patterns continuously according to claim 6, wherein said storage space can be installed with a drawer.

8. The device for changing game patterns continuously  
10 according to claim 1, wherein the game patterns can be one of the group of chess, gobang, strategy game, Kong Ming chess, Chinese checkers and ticktacktoe.

9. The device for changing game patterns continuously according to claim 2, wherein said game objects are the tools in  
15 need of player playing on the game patterns.

10. The device for changing game patterns continuously according to claim 6, wherein said game objects are the tools in need of player playing on the game patterns.

11. The device for changing game patterns continuously  
20 according to claim 9, wherein said game objects are the tools in need of playing one of games of chess, Chinese chess, gobang, strategy game, Kong Ming chess, Chinese checkers and ticktacktoe.

12. The device for changing game patterns continuously

according to claim 10, wherein said game objects are the tools in need of playing one of games of chess, Chinese chess, gobang, strategy game, Kong Ming chess, Chinese checkers and ticktacktoe.

5        13. The device for changing game patterns continuously according to claim 1, wherein the materials of said drawing plan can be any materials which can be written on it.

14. The device for changing game patterns continuously according to claim 11, wherein said drawing plan is chosen  
10        from one of the group of cloth, paper and artificial leather.

15        15. The device for changing game patterns continuously according to claim 1, wherein said each pivots has a groove setting on the surface, and a binder is installed above the groove with extends to two ends of the pivots to fix the drawing  
plan

16. The device for changing game patterns continuously according to claim 1, wherein said drawing plan can be fix on said each pivots by one of the method of pasting, needling, screwing, punching a hole and roping.

20        17. The device for changing game patterns continuously according to claim 1, wherein said pivots can be operated by one of the method of manual, motor and gear wheel.
